SUMMARY

An aspiring full-stack developer with hands-on experience in building responsive web applications using JavaScript, React, Node.js, and MongoDB. Skilled in designing RESTful APIs, implementing front-end interfaces, and optimizing application performance. Strong understanding of database management, version control, and time management skills. Interested in contributing to dynamic development teams and providing high-quality software solutions.

EDUCATION

Masai School <i>Full Stack Development</i>	Nov 2024 - Present
Lakshmi Narain College of Technology and Science, Indore <i>Bachelor of Engineering in Mechanical Engineering</i>	July 2015 - May 2019 CGPA: 6.9/10

EXPERIENCE

YHills <i>Web Development Internship</i>	May 2024 - July 2024 <i>Certificate</i>
--	--

- Developed interactive and responsive web pages using HTML, CSS, and JavaScript.
- Learned and implemented React fundamentals to build dynamic user interfaces.
- Applied Bootstrap to enhance design consistency and cross-device responsiveness.

SKILLS

Technical Skills:	HTML, CSS, JavaScript, React, Firebase, Tailwind CSS, Node.js, Express.js, MongoDB
Soft Skills:	Problem-solving, Adaptability, Communication and Time management.
Tools:	VS Code, Git/GitHub, npm, Postman

PROJECTS

ClimeCast - Weather and News Dashboard	Frontend Backend GitHub
Tech Stack: Vite React Tailwind CSS Express.js MongoDB JWT Openweather and News APIs	
Features: OTP Based Authentication Real-time Weather Updates News Aggregation Favorite Cities Responsive UI	
- Implemented OTP-based authentication allowing users to securely access the dashboard. - Developed real-time weather updates showing current conditions and forecasts for any city. - Integrated news aggregation to display latest headlines from multiple sources on the dashboard. - Added functionality to save frequently visited cities to favorites for quick access. - Built with Express + MongoDB REST APIs with validation, error handling, and centralized logging for backend services.	
BudgeX - Personal Finance Manager	Link GitHub
Tech Stack: Vite React Redux Toolkit Firebase Tailwind CSS Shadcn UI	
Features: Authentication Income and Expense Management Interactive Charts Export Report	
- Implemented dynamic visualizations using Recharts to track all transactions over time. - Enabled adding, deleting, and managing income and expenses seamlessly. - Provided option to download financial data as Excel reports for easy record-keeping. - Added theme toggle functionality for switching between Light and Dark modes. - Integrated Firebase for authentication, database storage, and real-time updates.	
Drobe - E-commerce Platform	Link GitHub
Tech Stack: HTML CSS JavaScript Firebase Tailwind CSS Bootstrap	
Features: User/Vendor Dashboards Authentication Search, Filtering, Sorting Cart/Wishlist Checkout	
- Developed multi-vendor support with separate dashboards for users and vendors, enabling independent management of products and orders. - Integrated Firebase for secure authentication, real-time database updates, and seamless user experience. - Implemented search, filtering, and sorting functionalities to help users easily find products. - Built add-to-cart and wishlist functionality with dynamic updates and persistent storage. - Designed with Tailwind CSS and Bootstrap to ensure seamless experience across devices.
